

FRO-BM5LEDLASER

Introducing the FRO-BM5LEDLASER.

An accurate wheel balancer that incorporates technology that is extremely easy to use. The tire technician can accurately balance the wheel and tire assembly. The FRO-BM5LEDLASER is also an outstanding value. The simplicity to our design means less components to fail.

The features packed into this top of the line machine, are the ones technicians appreciate most. Quick and easy programming data entry with the distance/diameter/width gauges.

The LED lights illuminate inside the wheel for maximum visibility. The laser blade provides location for accurate stick on weight placement. Another great feature is the double stop. The machine automatically stops at the first weight position for accurate weight placement and speed. At the press of a button, the machine automatically stops at the second weight position.

This balancer can also save the shop money with the "ECO" weight mode. Minimizes wheel weight consumption.

STANDARD

3 PIECE CONE SET

QUICK NUT

Features

Quick program Automatic distance + Diameter measurement.

Automatic double LED lights.

Spoke program for hidden weight mode.

Rim run-out measurement and mounting check.

ECO WEIGHT

Modern balancing system to minimize wheel weights consumption.

TECHNICAL DATA

Rim diameter	10" - 26"
Rim width	1.5" - 22"
Max wheel weight	70 kg / 154 lb
Read-out accuracy	1 g
Rotation speed (rpm)	<100
Power supply	110 V / 60/1ph / 15 AMP
