EXTRA WIDE (BALOON TYPE)

15" 7246

EXTRA LARGE

46" 7246

Features

- The frame is large and reinforced, to grant the utmost rigidity to the structure and chucking table.
- The gear box is installed between two steel plates, to avoid flexing during operation.
- The extra height of the vertical post and tool shaft allow operation on rims to a max. of 15" (381 mm) width.

FRO-TS326V

Introducing the FRO-TS326V tire machine. A high volume, high performance tire changer. This machine is the workhorse of the Frontline tire machine line up. It has been designed for the professional tire shop that has to deal with a wide variety of wheels and tires. From difficult wheel/tire combinations, large 4x4 tires to some skid steer, this machine is up to the task. The smooth variable rotation speed is what the top tire technicians ask for, and the FRO-TS326V delivers. Rotation torque is up to 50% more powerful than many competitors. Large 4x4 tires are easy to break the beads due to the oversize and adjustable bead breaker. The adjustable 10"-28.5" rim clamping range is what tire shop professionals need to service their customers. This is one of the most dependable machines you can have, the FRO-TS326V, is THE high quality, high performing, tire machine you have been looking for.
